## SULLIVAN'S ISLAND DESIGN REVIEW BOARD

2056 Middle St. • P O Box 427 • Sullivan's Island, SC • 29482 • (843) 883-3198

Project Address:

Submittal Date:

Meeting Date:

1766 Ion Mc

April 18, 2023

May 17, 2023

Requested Approval:

☐

Conceptual

☐

Preliminary

☒

Final

**Review Process:** A pre-application meeting is recommended with Planning staff as soon as the owner and/or design professional identify design objectives. Following the pre-application meeting, **Conceptual plans** should be submitted to the Design Review Board for review and comment. **Preliminary** or even **Final** plan review is generally required but may be waived at the discretion of the Board. Incomplete submittals or requests not consistent with Zoning Ordinance standards will be returned to the applicant and the project will not be part of the meeting agenda in accordance with Zoning Ordinance §21-109 F. (4).

The following items shall be included to receive plan approval:

- ☒ Application fee (Checks payable to Sullivan's Island Design Review Board)
- ☒ Completed Application to Sullivan's Island Review Board form (**FORM A**)
- ☒ Completed Sullivan's Island DRB Request for Review form (**FORM B**)
- ☒ Completed Zoning Standards Compliance Worksheet (**FORM C**)
- ☒ Completed Historic Worksheet (**FORM D.1**), or ☐ Neighborhood Compatibility Worksheet (**FORM D.2**)
- ☒ **Two (2) sets** of Drawings, 11" x 17" size. Drawings to include:
  - ☐ **A current as-built survey**, Certified by a S.C. Registered Land Surveyor [ 1/16" = 1'-0" OR 1" = 20'-0" Required for all new construction and for work which expands or is outside of an existing building footprint; illustrating the following:
    - All applicable Flood Zone information
    - Setbacks, property lines and easements
    - Spot elevations required to comply with Section 21-24
    - OCRM Critical Lines, or Baseline and Setback if applicable
    - Existing Structures, if applicable
  - ☐ **Site Plan** [ 1/16" = 1'-0" OR 1" = 20'-0" scale ], illustrating the following:
    - Existing structures, if applicable
    - Proposed new structures
    - All applicable survey information
  - ☐ **Floor Plans** [ 1/8" = 1'-0" scale ], with the following requirements:
    - Exterior dimensions
    - Graphically depict the outlines of heated space, covered porches and open decks.
    - In the case of renovations and/or additions, the outlines of existing and new construction must also be shown.
  - ☐ **Exterior Elevations** [ 1/8" = 1'-0" scale ], with the following requirements:
    - All exterior materials such as wood, stucco, roofing and / or masonry shall be graphically represented for intent.
    - Elevations must be rendered with shadows depicting roof and / or deck overhangs, changes in wall plane, or massing. Devoid of any graphically
    - Roof ridge heights and Finished Floor Elevation (FFE) and their relationship to FEMA Base Flood Elevation (BFE)
  - ☐ **Optional:**
    - 3-D perspective sketches and / or models are encouraged.
    - Any relevant photographs or documentation that might be descriptive (of adjacent properties).

# REQUEST FOR HISTORIC DESIGN REVIEW (FORM D.1)

Narrative for Scope of Work

Sullivan's Island Design Review Board

2056 Middle St. • P O Box 427 • Sullivan's Island, SC • 29482 • (843) 883-3198

- Do you propose any exterior changes to the historic structure? Yes ☒ No ☐
- If you answered "yes," please provide a detailed explanation and sequence of the work below:

## Section 21-97. C Historic Preservation Standards

Submit in writing, and be prepared to describe how your project is consistent with the following ten preservation standards, and the most recent version of the Secretary of Interior's Guidelines for the Treatment of Historic Properties.

**\*\*On your elevation drawings show all existing conditions and proposed changes. Detail existing materials and highlight all new and preserved architectural and structural elements.**

<https://www.nps.gov/tps/standards/treatment-guidelines-2017.pdf>

- (a) Using a property as it was used historically or giving a new use that requires minimal change to its distinctive materials, features, spaces, and spatial relationships;
- (b) Retaining and preserving the historic character of a property; avoidance of the removal of distinctive materials or alteration of features, spaces, and spatial relationships that characterize a property;
- (c) Avoiding changes that create a false sense of historical development, such as adding conjectural features or elements from other buildings;
- (d) Retaining and preserving changes to a property that have acquired historic significance in their own right;
- (e) Preserving distinctive materials, features, finishes, and construction techniques or examples of craftsmanship that characterize a property;
- (f) Repairing rather than replacing deteriorated historic features; or where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture, and, where possible, materials;
- (g) Utilizing the gentlest means of chemical or physical treatments;
- (h) Protecting and preserving the archeological resources in place, and if disturbing, mitigation measures will be undertaken;
- (i) Not destroying historic materials, features, and spatial relationships that characterize the property; differentiating the new work from the old and making it compatible with the historic materials, features, size, scale, and proportion, and massing to protect the integrity of the property and its environment; and,
- (j) Undertaking new construction in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.

This application is simply to request approval to change the color of the metal roofing on 1766 Ian Ave from Colonial Red to Ash Grey. The owners of the units have all agreed on changing the new metal roofing from Colonial Red to Ash Grey. Harper Construction has already been approved to replace the existing metal roof with new .032 aluminum standing seam panels. We are seeking approval to change the color to Ash Grey. This is a 3 story dwelling with a flat metal roofing section the color of the metal will not be seen from the ground level. Therefore, will have no impact on the visual aspect of the dwelling.

## NEIGHBORHOOD COMPATIBILITY WORKSHEET (FORM D-2)

### Sullivan's Island Design Review Board

2056 Middle St. • P O Box 427 • Sullivan's Island, SC • 29482 • (843) 883-3198

In accordance with the Sullivan's Island Zoning Ordinance, Section 21-111, the DRB shall only grant modifications of the Zoning Ordinance standards if the design is compatible with the surrounding neighborhood. The *Standards for Neighborhood Compatibility* should:

- The pattern of setback, foundation elevations and building heights;
- The massing and orientation of structures;
- Fenestration (windows) and doorway spacing and alignment patterns;
- The placement and use of porches, decks and patios;
- The placement and alignment of driveways;
- The treatment of front and side facades;
- Where appropriate, the types of roofs, the roof pitches, and other aspects of roof design;
- Where appropriate, distinctive architectural styles that characterize a street or neighborhood; and
- Such other factors as the Board may consider relevant to defining the character of the neighborhood.

Additionally, the following check-list will help the applicant and DRB determine if the proposed design is properly integrated into the context and character of the existing neighborhood.

**Principal Building Square Footage (§ 21-27):** When requesting relief for additional Principal Building Square Footage, the DRB will be looking carefully at ways the applicant is offsetting the impact of the requested relief. The applicant might choose one or more of the following techniques, for example:

- Lower the first-floor height closer to grade to offset the additional massing.
- Lower the main roof eave height to offset the additional massing.
- Lower the overall roof height to reduce the additional massing
- Reduce the amount of second floor wall surface
- Place the second-floor square footage within the roofline
- Provide additional setbacks for second story walls to reduce the impact to neighbors
- Assure to the DRB that the design is unique, well articulated and appropriately scaled
- DRB suggests that prior to submittal please review your plans with neighbors and request their approval of square footage changes.

N/A This is a request to change the roof color. No structure changes

**Principal Building Coverage (§ 21-25):** When requesting relief for Principal Building Coverage, the DRB will be looking at ways the applicant is offsetting the impact of the requested relief. The applicant might choose one or more of the following techniques, for example:

- Lower the first-floor height closer to grade to offset any additional massing.
- Coverage relief typically includes additional lower one-story design elements. Please indicate clearly these one-story elements in the design.
- Reduce the amount of second story wall surface area and second story heated sq. ft.

- Coverage Relief is typically granted for smaller than average lots due to zoning formulas.
- Assure to the DRB that the design is unique, well-articulated and appropriately scaled.

N/A this is a request to change the roof color of the metal roofing section.

**Front and Side Building Setbacks (§ 21-22):** Building setbacks are intended to create open space (landscaping, sunlight, distance) between buildings and the right-of-way. When requesting relief for Front and Side Setbacks, the DRB will be looking at ways the applicant is offsetting the impact of the requested relief. The applicant might choose one or more of the following techniques, for example:

- Request Side Setback relief as a means of preserving trees, tree canopies or other significant landscape elements.
- Consider designing one story construction in the requested relief zone to preserve sunlight and views.
- Provide well articulated side facades with separated massing elements.
- DRB suggests that prior to submittal please review your plans with neighbors and request their approval of setback changes.

N/A this is a request to change the color of the metal roofing section of the dwelling

**Second Story Side Façade Setback (§ 21-22):** Second story side façade setback of two feet reduces the overall height and mass of the wall and ensures more sunlight for the adjacent property. Two-foot second floor setbacks are required for any wall in excess of 10'. DRB can double that width to 20'. The DRB does not have the authority to completely eliminate the second story setback.

N/A this is a request to change the color of the metal roofing section of the dwelling.

**Side Façade Articulation (§ 21-29):** The depth and width of a building has a substantial impact on its mass and scale. Removing the requirement for articulations in the side wall can result in a long unbroken side façade, which lacks visual appeal and creates more mass.

- It is unlikely that the DRB will grant 100% relief allowing a 60' long unarticulated wall.
- When requesting any relief less than 100%, assure to the DRB that the design is unique, well articulated and appropriately scaled

N/A this is a request to change the color of the metal roofing section of the dwelling.
