RE: Tree Assessment Letter for 2602 Goldbug Ave., Sullivan's Island, SC

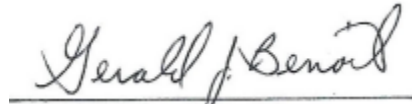

Dear Mike,

At your request, we have examined a 22" dbh Live Oak tree located on the front center of the above referenced property. Our findings are as follows:

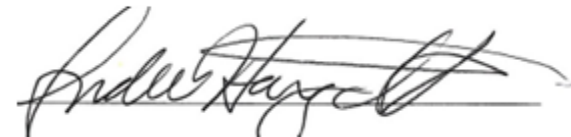

- This tree shows no structural defects in the trunk or any of the limb attachments.
- This tree seems vigorous with no evidence of insects or disease attacks.
- The limb growth is considered to be normal and consistent with neighboring Live Oak trees. Therefore, this tree is considered healthy. See photo 34.

Please let me know if you have any questions or concerns.

Respectfully,

Gerald Benoit ISA, PA
